-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 24 September 2003.
- 2a) ☐ This action is FINAL. 2b) ☐ This action is non-final.
- 3) ☒ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Paper No(s)/Mail Date. \_\_\_\_\_.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: \_\_\_\_\_.

## **DETAILED ACTION**

This application is in condition for allowance except for the following formal matters:

### ***Drawings***

1. The drawings are objected to because in Fig. 11, "308b" should be - - 380b - - . Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

3. The abstract of the disclosure is objected to because the paragraph should start with a word in capitals and "means", page 65, line 5, should be avoided in the abstract. It is also too long. It should not exceed 150 words.

Correction is required. See MPEP § 608.01(b).

4. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

5. The disclosure is objected to because of the following informalities:

The specification is replete with errors too many to discuss. Applicant is encouraged to carefully review the specification for errors. Examples of errors are:

Page 25, line 17, "353L" should be - - 352L - -;

Page 26, line 4, "353R" should be - - 352R - -; and

Page 27, line 22, "359R" should be - - 352R - -.

Appropriate correction is required.

***Claim Objections***

6. Claims 7-12 and 15-20 are objected to because of the following informalities:

As to claim 7, lines 6-7, "development position" should be - - developing position

- -.

As to claim 11, line 5, "said rotary member" lacks antecedent basis.

As to claim 15, lines 10-11, "the main assembly of the apparatus" lacks antecedent basis.

As to claim 19, lines 3-4, "development position" should be - - developing position

- -.

As to claim 20, line 3, "development position" should be - - developing position - -

Appropriate correction is required.

***Allowable Subject Matter***

7. Claims 1-20 are allowed over the prior art of record because the prior art fails to show a second projected portion on a cartridge's frame that engages with a second positioning portion provided in the main assembly of the image forming apparatus when the developing cartridge is mounted to the main assembly to regulate rotation of the cartridge about the first positioning portion. The second projected portion is urged in a direction of contacting to the second positioning portion when the developing cartridge is set in the main assembly. This is found in all of claims 1-20, but not disclosed nor suggested by the prior art of record.

Art Unit: 2852

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yamaguci et al., Sawano, Tanaka, Yoshino et al., Yokomori et al., and Kimura et al. disclose art in developing devices in a rotating assembly.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
